

## WHO WE ARE

Orion Engineers and Associates is a professional engineering firm founded in 2016, primarily to serve the aviation market with airport engineering services. Orion was founded by four managing partners with a motivation to provide expert service, quality deliverables, and to be responsive as a value proposition to our clients.

## OUR SERVICES

Our technical staff have over 100 YEARS of combined experience in FAA AIP Grant funded projects specializing in airport engineering, design, and construction management at commercial and general aviation airports throughout the United States. Our particular expertise and strength is in the planning, design, and construction management of airfield projects to include:

- Project Management
- Contract Documents
- FAA Advisory Circulars
- Airfield Planning
- Pavement Design
- Grading & Drainage
- Resident Engineering & Inspection
- Construction Cost Estimating
- Construction Management
- Construction Administration
- Construction Safety & Phasing Plans
