

WHAT IS PAVEMENT PRESERVATION CERTIFICATION ?

Certification requirements are common in highway construction and have existed for asphalt, concrete, and soils since they were first endorsed by AASHTO in the late 1970's.

Pavement preservation certification was authorized by the AASHTO TSP-2 Oversight Panel in early 2016 and includes an examination administered to both agency and contractor personnel.

TREATMENT CERTIFICATION

Ensuring Success

PAVEMENT PRESERVATION TREATMENT CERTIFICATION

Increasing field competence to ensure consistently high-quality preservation treatments

pavementpreservation.org

WHY CERTIFICATION?

The purpose of the pavement preservation certification is to achieve consistently high-quality preservation treatments by testing owner agency and contractor personnel on critical competencies in constructing preservation treatments.

With the implementation of performance measures through MAP-21 and the FAST Act, states are going to be held accountable for the condition of their road network. With this accountability comes tremendous opportunity to use pavement preservation treatments as the most cost-effective method to improve network conditions. By the same token, poor treatment performance may reduce or eliminate an agency's use of that treatment since the potential ramifications of missing network condition targets are substantial.

CERTIFICATION

WHO SHOULD GET CERTIFIED?

Agency personnel

- Headquarters/District/Region/Division preservation specialists
- Field inspectors
- Consultants

Contractor personnel

- Superintendents
- Foremen
- Equipment operators
- Company trainers

COST

| | |
|------------------------|-------|
| State and Local Agency | \$200 |
| Consultant | \$325 |
| Contractor Employee | \$325 |

Costs are approximate

If you would like to schedule an exam that meets your needs, please contact the National Center for Pavement Preservation (NCP) at 517-432-8220.

EXAMINATION

TREATMENTS

- Chip Seals
- Slurry Systems
- Crack Treatments

FAQs

How Long Does The Examination Take?

Examinees generally take 45 to 90 minutes to complete the exam.

What Score Is Needed To Pass?

A score of 70% or better is needed to pass.

How To Prepare For a Certification Examination?

Examinees are strongly encouraged to take the free ISSA web-based training before sitting for the exam. To enroll in the web-based training, visit the website

<http://slurry.org/wbt/issa-wbt-login-instructions/> for instructions.

How Long Are Personnel Certified For?

Treatments certification will be valid for 3 years from the exam date.
